

## Conference Room Solutions

### Benefits

- > Maximise your Unified Communications investment
- > Use the Unified Communications client of your choice
- > Create an inclusive collaboration environment
- > Easy to use

Meetings have changed. They are getting smaller and shorter and they are leveraging more technology than ever before. Meetings today need to remove the traditional meeting room technology limitations to create a more flexible, agnostic experience, making provision for in person and video conferencing capabilities for remote workers. The hybrid approach to work has changed the way we meet and how those meetings are consumed.

This is why Saicom has created Saicom Conference Room Solutions, a comprehensive offering that brings together the hardware, software and market leading support to make meetings seamless. Our Conference Room Solutions are perfect for clients that want to deploy smaller huddle rooms; collaboration spaces; smart boardrooms and dedicated Microsoft Teams, Webex or Zoom environments.

Best of all, Saicom's Conference Room Solutions allows you to make use of any Unified Communications client, such as Cisco Webex, Microsoft Teams, Google Meet or Zoom Rooms. Allowing participants to make use of the hardware and client that they are familiar with saves time and improves productivity by greatly reducing the complexity of hosting meetings and sharing content. With employees bringing their own devices to meetings, it's vital that technology in meeting environments is intuitive, easy to use and highly compatible.

Saicom provides Logitech hardware and services to host internal and external video conferences. Saicom supplies, installs and maintains this technology as a white glove service, including centralised billing and a single point of contact.

## Benefits

- **Maximise your Unified Communications investment**  
Saicom's Conference Room Solutions provide a flexible and scalable solution for organisations of all sizes. Whether it's a small huddle room or a large conference space, Logitech's hardware adapts to various room sizes and configurations, ensuring that businesses can easily scale their Unified Communications capabilities as their needs evolve.
- **Use the Unified Communications client of your choice**  
Saicom's Conference Room Solutions supports all Unified Communications clients, such as Cisco Webex, Microsoft Teams, Google Meet or Zoom Rooms.
- **Create an inclusive collaboration environment**  
Build a hybrid workplace that accommodates on-site and remote meetings with employees, customers and partners.
- **Easy to use**  
With an innovative design that maximises compatibility and incorporates DisplayLink® Plug-and-Display technology, Logitech Swytch offers a one-cable laptop link to a room's conference camera and display, making it easy for teams to meet, present, and stream over any service. Our solutions remove any complexity, reducing the reliance on IT support, saving time and improving productivity.

## Key Features

- Small, medium and large room systems including the Cameras, Microphones and Cabling
- Motorised pan and tilt, beamforming mics, and dual-display support for every room size
- AI-driven performance with RightSense™ technologies for flattering video and natural conversations
- Brilliant optics and powerful audio with configurations for every room size.
- Auto-level loud and soft voices while suppressing unwanted noise.
- 24/7 support

## Our packages

Mobile, small (1 - 4 people) and medium (5 - 8 people) room packages have been pre-configured for ease of deployment and operation. These can be tailored to meet your specific needs and Saicom will arrange for one of our meeting room specialists to assess your environment and provide recommended solutions. Add-on options are available.

Small and medium packages include the camera and microphone arrays as well as the necessary cabling for content sharing and to connect your laptop or desktop device to the camera. The mobile package is a small all-in-one USB device perfect for people on the road.

Large room packages are available but require a consultation to determine your needs and the specific room requirements.

## What is required to enable Saicom's Conference Room Solutions?

- A Unified Communications client on your device
- A USB-A or C port on your device for connecting to the room system
- An internet connection with sufficient bandwidth for video conferencing
- A room that can be set aside for video conferencing or a small huddle room that can be used for smaller conferences
